

**Event (Disease or Condition) Code List, Arranged in Alphabetical Order, for Nationally Notifiable Diseases
and for Other Conditions of Public Health Importance
Epidemiology Program Office, Centers for Disease Control and Prevention
Updated as of December 18, 2002**

Code	Event	Notes+	Print Criteria†
10245	African Tick Bite Fever		
10560	AIDS*	No longer collected through NETSS. Data supplied to EPO by CDC program on monthly basis.	Print criteria are determined by the CDC AIDS/HIV program.
11040	Amebiasis	Deleted from NNDL in 1995.	
10350	Anthrax*		All reports are printed. Before printing, information is verified with the State Epidemiologist, and a courtesy e-mail is sent to NCID.
10010	Aseptic meningitis	Deleted from NNDL in 1995.	
32020	Asthma, Work-related		
12010	Babesiosis		
10650	Bacterial meningitis, other	Extended record format available for NETSS transmission.	
10530	Botulism, foodborne*		All reports are printed.
10540	Botulism, infant*		All reports are printed.
10550	Botulism, other (includes wound)*	Codes 10548 and 10549 can be used to track "other unspecified" and "wound" botulism separately. Event code 10550 should only be used by states who cannot report separately using codes 10548 and 10549.	All reports are printed.

Abbreviations are defined on the last page. States can voluntarily report data on any diseases/conditions in this event code list to EPO through NETSS.

*Diseases in bold have been designated by CSTE as nationally notifiable and should be reported to CDC on a regular basis.

Code	Event	Notes+	Print Criteria†
10548	Botulism, other unspecified*	Use code 10548 if you can differentiate "other unspecified" botulism from "wound" botulism; otherwise, use code 10550.	All reports are printed.
10549	Botulism, wound*	Use code 10549 if you can differentiate "wound" botulism from "other unspecified" botulism; otherwise, use code 10550.	All reports are printed.
10020	Brucellosis*		All reports are printed.
11020	Campylobacteriosis		
10273	Chancroid*	Extended record format available for STD*MIS line-listed data transmitted through NETSS.	All reports are printed.
10274	Chlamydia trachomatis genital infection*	Added to NNDL in 1995. Extended record format available for STD*MIS data transmitted through NETSS.	All reports are printed.
10470	Cholera (toxigenic <i>Vibrio cholerae</i> 01 or 0139)*		All reports are printed. Before printing, the existence of "toxigenic O1 or O139" serospecies and other information is verified with the State Epidemiologist, and a courtesy e-mail is sent to NCID.
11900	Coccidioidomycosis*	Added to NNDL in 1995.	All reports are printed.
11580	Cryptosporidiosis*	Added to NNDL in 1995.	All reports are printed.
11575	Cyclosporiasis*	Added to NNDL in 1999.	All reports are printed.
10680	Dengue Fever		
10685	Dengue hemorrhagic fever		

Abbreviations are defined on the last page. States can voluntarily report data on any diseases/conditions in this event code list to EPO through NETSS.

*Diseases in bold have been designated by CSTE as nationally notifiable and should be reported to CDC on a regular basis.

Code	Event	Notes+	Print Criteria†
10040	Diphtheria*	There is no disease-specific extended record transmitted through NETSS for this condition.	CSTE VPD print criteria are used. Cases with confirmed, probable, and unknown case status are printed.
11087	Ehrlichiosis human, other or unspecified agent*	Added to NNDL in 2001.	All reports are printed.
11085	Ehrlichiosis, human granulocytic* (HGE)	Added to NNDL in 1998.	All reports are printed.
11086	Ehrlichiosis, human monocytic* (HME)	Added to NNDL in 1998.	All reports are printed.
10070	Encephalitis, post-chickenpox	Deleted from NNDL in 1995.	
10080	Encephalitis, post-mumps	Deleted from NNDL in 1995.	
10090	Encephalitis, post-other	Deleted from NNDL in 1995.	
10050	Encephalitis, primary	Deleted from NNDL in 1995. Replaced by event codes 10051-10058.	
10058	Encephalitis, Cache Valley		
10054	Encephalitis/meningitis, California serogroup viral*	Added to NNDL in 1995 (see Encephalitis, primary, 10050).	Cases with confirmed and probable case status are printed, as per the request of NCID. In addition, for the <i>MMWR</i> weekly provisional tables only, the event date year must also equal the <i>MMWR</i> year, for the reported case to print (effective January 3, 2003).

Abbreviations are defined on the last page. States can voluntarily report data on any diseases/conditions in this event code list to EPO through NETSS.

*Diseases in bold have been designated by CSTE as nationally notifiable and should be reported to CDC on a regular basis.

Code	Event	Notes+	Print Criteria†
10053	Encephalitis/meningitis, eastern equine* (EEE)	Added to NNDL in 1995 (see Encephalitis, primary, 10050).	Cases with confirmed and probable case status are printed, as per the request of NCID. In addition, for the <i>MMWR</i> weekly provisional tables only, the event date year must also equal the <i>MMWR</i> year, for the reported case to print (effective January 3, 2003).
10057	Encephalitis/meningitis, Powassan*	Added to NNDL in 2002.	Cases with confirmed and probable case status are printed, as per the request of NCID. In addition, for the <i>MMWR</i> weekly provisional tables only, the event date year must also equal the <i>MMWR</i> year, for the reported case to print (effective January 3, 2003).
10051	Encephalitis/meningitis, St. Louis*	Added to NNDL in 1995 (see Encephalitis, primary, 10050).	Cases with confirmed and probable case status are printed, as per the request of NCID. In addition, for the <i>MMWR</i> weekly provisional tables only, the event date year must also equal the <i>MMWR</i> year, for the reported case to print (effective January 3, 2003).

Abbreviations are defined on the last page. States can voluntarily report data on any diseases/conditions in this event code list to EPO through NETSS.

*Diseases in bold have been designated by CSTE as nationally notifiable and should be reported to CDC on a regular basis.

Code	Event	Notes+	Print Criteria†
10055	Encephalitis/meningitis, Venezuelan equine (VEE)		
10056	Encephalitis/meningitis, West Nile*	Added to NNDL in 2002. Use code 10049 for West Nile Fever.	Cases with confirmed and probable case status are printed, as per the request of NCID. In addition, for the <i>MMWR</i> weekly provisional tables only, the event date year must also equal the <i>MMWR</i> year, for the reported case to print (effective January 3, 2003).
10052	Encephalitis/meningitis, western equine* (WEE)	Added to NNDL in 1995 (see Encephalitis, primary, 10050).	Cases with confirmed and probable case status are printed, as per the request of NCID. In addition, for the <i>MMWR</i> weekly provisional tables only, the event date year must also equal the <i>MMWR</i> year, for the reported case to print (effective January 3, 2003).
11562	Enterohemorrhagic <i>Escherichia coli</i> (EHEC) shiga toxin+ (serogroup non-0157)*	Added to NNDL in 2001.	All reports are printed.
11560	Enterohemorrhagic <i>Escherichia coli</i> (EHEC) O157:H7*	Added to NNDL in 1994.	All reports are printed.

Abbreviations are defined on the last page. States can voluntarily report data on any diseases/conditions in this event code list to EPO through NETSS.

*Diseases in bold have been designated by CSTE as nationally notifiable and should be reported to CDC on a regular basis.

Code	Event	Notes+	Print Criteria†
11564	Enterohemorrhagic <i>Escherichia coli</i> (EHEC) shiga toxin+ (not serogrouped)*	Added to NNDL in 2001.	All reports are printed.
10570	Flu activity code (Influenza)	Data collected for CDC program.	
11570	Giardiasis*	Added to NNDL in 2002.	All reports are printed.
10280	Gonorrhea*	Extended record format available for STD*MIS line-listed data transmitted through NETSS.	All reports are printed.
10276	Granuloma inguinale (GI)	Deleted from NNDL in 1995. Extended record format available for STD*MIS line-listed data transmitted through NETSS.	
10590	<i>Haemophilus influenzae</i>, invasive disease*	Extended record format available for NETSS transmission	CSTE VPD print criteria are used. Cases with confirmed, probable, and unknown case status are printed.
10380	Hansen disease (Leprosy)*		All reports are printed.
11610	Hantavirus infection	If infection results in illness meeting the Hantavirus Pulmonary Syndrome case definition, use event code 11590 and do not report using code 11610. However, if patient has evidence of infection without meeting the Hantavirus Pulmonary Syndrome case definition, report using 11610.	
11590	Hantavirus Pulmonary Syndrome*	Added to NNDL in 1995.	All reports are printed. Before printing, information is verified with the State Epidemiologist, and a courtesy e-mail is sent to NCID.
42020	Head injury		

Abbreviations are defined on the last page. States can voluntarily report data on any diseases/conditions in this event code list to EPO through NETSS.

*Diseases in bold have been designated by CSTE as nationally notifiable and should be reported to CDC on a regular basis.

Code	Event	Notes+	Print Criteria†
11550	Hemolytic uremic syndrome postdiarrheal*	Added to NNDL in 1995.	All reports are printed. Before printing, information is verified with the State Epidemiologist, and a courtesy e-mail is sent to NCID.
10110	Hepatitis A, acute*	Extended record format available for NETSS transmission.	All reports are printed.
10105	Hepatitis B virus infection, chronic*	Added to NNDL in 2003.	Only confirmed cases are printed, as per the CDC Hepatitis Branch
10100	Hepatitis B, acute*	Extended record format available for NETSS transmission.	All reports are printed.
10104	Hepatitis B, virus infection perinatal*	Event code 10100 was previously used for this condition.	All reports are printed.
10106	Hepatitis C virus infection, past or present*	Added to NNDL in 2003	Only confirmed cases are printed, as per the CDC Hepatitis Branch.
10101	Hepatitis C, acute*	Extended record format available for NETSS transmission.	All reports are printed. Data merged with event code 10480 when printed in MMWR tables under heading "Hepatitis, C/NA,NB."
10102	Hepatitis Delta co- or super-infection, acute (Hepatitis D)	Data collected for CDC program. Extended record format available for NETSS transmission.	
10103	Hepatitis E, acute	Data collected for CDC program. Extended record format available for NETSS transmission.	
10480	Hepatitis, non A, non B, acute	Deleted from NNDL in 2003	
10120	Hepatitis, viral unspecified	Deleted from NNDL in 1995.	

Abbreviations are defined on the last page. States can voluntarily report data on any diseases/conditions in this event code list to EPO through NETSS.

*Diseases in bold have been designated by CSTE as nationally notifiable and should be reported to CDC on a regular basis.

Code	Event	Notes+	Print Criteria†
10562	HIV Infection, adult*	Not collected through NETSS. Data are not currently supplied by CDC program.	
10561	HIV Infection, pediatric*	Not collected through NETSS. Data supplied to EPO by CDC program on a monthly basis.	Print criteria are determined by the CDC HIV/AIDS program.
10568	Human T-Lymphotropic virus type I infection (HTLV-I)		
10569	Human T-Lymphotropic virus type II infection (HTLV-II)		
11070	Influenza, animal isolates		
11060	Influenza, human isolates		
50000	Kawasaki Disease		
32010	Lead poisoning		
10490	Legionellosis*		All reports are printed.
10390	Leptospirosis	Deleted from NNDL in 1995.	
10640	Listeriosis*	Added to NNDL in 1999. Extended record format available for NETSS transmission.	All reports are printed.
11080	Lyme disease*	Extended record format available for NETSS transmission.	All reports are printed.
10306	Lymphogranuloma venereum (LGV)	Deleted from NNDL in 1995. Extended record format available for STD*MIS line-listed data transmitted through NETSS.	
10130	Malaria*		All reports are printed.
10140	Measles (rubeola), total*	Extended record format available for NETSS transmission.	CSTE VPD print criteria are used. Cases with confirmed and unknown case status are printed.

Abbreviations are defined on the last page. States can voluntarily report data on any diseases/conditions in this event code list to EPO through NETSS.

*Diseases in bold have been designated by CSTE as nationally notifiable and should be reported to CDC on a regular basis.

Code	Event	Notes+	Print Criteria†
10150	Meningococcal disease* (<i>Neisseria meningitidis</i>)	Extended record format available for NETSS transmission.	All reports are printed.
42040	Motor vehicle injury	Data for this event are not currently transmitted through NETSS.	
10308	Mucopurulent cervicitis (MPC)	Extended record format available for STD*MIS line-listed data transmitted through NETSS.	
10180	Mumps*	Extended record format available for NETSS transmission.	CSTE VPD print criteria are used. Cases with confirmed, probable, and unknown case status are printed.
10317	Neurosyphilis*	Extended record format available for STD*MIS line-listed data transmitted through NETSS.	All reports are printed.
10307	Nongonococcal urethritis (NGU)	Extended record format available for STD*MIS line-listed data transmitted through NETSS.	
42060	Other injury		
10309	Pelvic Inflammatory Disease (PID), Unknown Etiology	Extended record format available for STD*MIS line-listed data transmitted through NETSS.	
10190	Pertussis*	Extended record format available for NETSS transmission.	CSTE VPD print criteria are used. Cases with confirmed, probable, and unknown case status are printed.
10440	Plague*		All reports are printed. Before printing, information is verified with the State Epidemiologist, and a courtesy e-mail is sent to NCID.

Abbreviations are defined on the last page. States can voluntarily report data on any diseases/conditions in this event code list to EPO through NETSS.

*Diseases in bold have been designated by CSTE as nationally notifiable and should be reported to CDC on a regular basis.

Code	Event	Notes+	Print Criteria†
10410	Poliomyelitis, paralytic*	There is no disease-specific extended record transmitted through NETSS for this condition.	CSTE VPD print criteria are used. Confirmed cases classified by an expert panel of polio experts are printed. Before printing, information is verified with the State Epidemiologist, and a courtesy e-mail is sent to NIP.
10450	Psittacosis* (Ornithosis)		All reports are printed.
10255	Q fever*	Added to NNDL in 1999.	All reports are printed.
10340	Rabies, animal*	Animal species reportable in NETSS transmission.	All reports are printed.
10460	Rabies, human*		All reports are printed. Before printing, information is verified with the State Epidemiologist, and a courtesy e-mail to NCID is sent.
11030	Reye syndrome		
11050	Rheumatic fever	Deleted from NNDL in 1995.	
10250	Rocky Mountain spotted fever*		All reports are printed.
10200	Rubella*	Extended record format available for NETSS transmission	CSTE VPD print criteria are used. Cases with confirmed and unknown case status are printed.

Abbreviations are defined on the last page. States can voluntarily report data on any diseases/conditions in this event code list to EPO through NETSS.

*Diseases in bold have been designated by CSTE as nationally notifiable and should be reported to CDC on a regular basis.

Code	Event	Notes+	Print Criteria†
10370	Rubella, congenital syndrome*		CSTE VPD print criteria are used. Cases with confirmed, probable, and unknown case status are printed. Before printing, information is verified with the State Epidemiologist, and a courtesy e-mail is sent to NIP.
11000	Salmonellosis*		All reports are printed.
11010	Shigellosis*		All reports are printed.
32000	Silicosis	Added to NNDL in 1996.	
11800	Smallpox	Code used for CDC historical data and for voluntary reporting from states. On the bioterrorism critical agents list.	
42010	Spinal cord injury		
11661	<i>Staphylococcus aureus</i> , coagulase-positive, methicillin- or oxacillin-resistant (MRSA)		
11665	<i>Staphylococcus aureus</i> , coagulase-positive, vancomycin-resistant (VRSA)		
11663	<i>Staphylococcus aureus</i> , vancomycin intermediate susceptibility (VISA)		
11710	Streptococcal disease, invasive, Group A*	Added to NNDL in 1995.	All reports are printed.

Abbreviations are defined on the last page. States can voluntarily report data on any diseases/conditions in this event code list to EPO through NETSS.

*Diseases in bold have been designated by CSTE as nationally notifiable and should be reported to CDC on a regular basis.

Code	Event	Notes+	Print Criteria†
11715	Streptococcal disease, invasive, Group B		
11716	Streptococcal disease, other, invasive, beta-hemolytic (non-group A and non-group B)	Added for use in the National Electronic Disease Surveillance System Bacterial Meningitis and Invasive Respiratory Disease Program Area Module	
11700	Streptococcal toxic-shock syndrome*	Added to NNDL in 1995.	All reports are printed.
11720	<i>Streptococcus pneumoniae</i> invasive, drug-resistant*	Added to NNDL in 1995.	All reports are printed.
11717	<i>Streptococcus pneumoniae</i>, invasive disease*	Added to NNDL in 2000. Only nationally notifiable in children < 5 years.	All reports are printed of cases in children < 5 years old.
50010	Sudden Infant Death Syndrome		
42050	Suicide		
10316	Syphilis, congenital*	Extended record format available for STD*MIS line-listed data transmitted through NETSS.	All reports are printed. Before printing, information is verified with the State Epidemiologist, and a courtesy e-mail to NCID is sent.
10313	Syphilis, early latent*	Extended record format available for STD*MIS line-listed data transmitted through NETSS.	All reports are printed.
10314	Syphilis, late latent*	Extended record format available for STD*MIS line-listed data transmitted through NETSS.	All reports are printed.
10318	Syphilis, late with clinical manifestations other than neurosyphilis*	Extended record format available for STD*MIS line-listed data transmitted through NETSS.	All reports are printed.
10311	Syphilis, primary*	Extended record format available for STD*MIS line-listed data transmitted through NETSS.	All reports are printed.

Abbreviations are defined on the last page. States can voluntarily report data on any diseases/conditions in this event code list to EPO through NETSS.

*Diseases in bold have been designated by CSTE as nationally notifiable and should be reported to CDC on a regular basis.

Code	Event	Notes+	Print Criteria†
10312	Syphilis, secondary*	Extended record format available for STD*MIS line-listed data transmitted through NETSS.	All reports are printed.
10310	Syphilis, total primary and secondary*	Used by states not using STD*MIS or other line-listed STD reporting through NETSS, but instead used for transmitting summary data through NETSS.	All reports are printed.
10315	Syphilis, unknown latent*	Extended record format available for STD*MIS line-listed data transmitted through NETSS.	All reports are printed.
10210	Tetanus*	Extended record format available for NETSS transmission	CSTE VPD criteria are used. Cases with confirmed and unknown case status are printed.
10520	Toxic-shock syndrome (staphylococcal)*		All reports are printed.
12020	Toxoplasmosis		
10270	Trichinosis*		All reports are printed.
10220	Tuberculosis*	Extended record format for system tracking is available from TIMS for NETSS transmission.	Print criteria are determined by the CDC Tuberculosis program.
10230	Tularemia*	Deleted from NNDL in 1995; Added to NNDL in 1999.	All reports are printed.
10240	Typhoid fever* (caused by <i>Salmonella typhi</i>)		All reports are printed.
10260	Typhus Fever, (endemic fleaborne, Murine)	Deleted from NNDL in 1993.	
11645	Vancomycin-Resistant <i>Enterococcus</i>		

Abbreviations are defined on the last page. States can voluntarily report data on any diseases/conditions in this event code list to EPO through NETSS.

*Diseases in bold have been designated by CSTE as nationally notifiable and should be reported to CDC on a regular basis.

Code	Event	Notes+	Print Criteria†
10030	Varicella (Chickenpox)*	Added to NNDL in 2003.	VPD print criteria are used. Cases with confirmed, probable, and unknown case status are printed.
11541	<i>Vibrio parahaemolyticus</i>		
11540	<i>Vibrio spp.</i> , non-toxigenic, other or unspecified		
11542	<i>Vibrio vulnificus</i>		
10049	West Nile Fever	Use code 10056 for West Nile encephalitis/meningitis.	
10660	Yellow fever*		All reports are printed. Before printing, information is verified with the State Epidemiologist, and a courtesy e-mail is sent to NCID.
11565	Yersiniosis		

†**Print policy for the National Notifiable Diseases Surveillance System:** For a case report of a nationally notifiable infectious disease to print in the *Morbidity and Mortality Weekly Report (MMWR)*, the reporting state or territory must have designated the nationally notifiable infectious disease as reportable in their state or territory for the year corresponding to the database year of report to CDC. After this criterion is met, the disease-specific criteria listed in the table above are applied. When the above-listed table indicates that “all reports” will be earmarked for printing, this means that cases reported through the National Electronic Telecommunications System for Surveillance (NETSS) that are designated with “unknown” or “suspect” case confirmation status will print just as “probable” and “confirmed” cases will print. Print criteria for Vaccine Preventable Diseases (VPD) reflect the case confirmation status print criteria described by the Council of State and Territorial Epidemiologists (CSTE) 1999 Position Statement #ID-08 entitled “Vaccine Preventable Diseases Surveillance Data.”

Abbreviations are defined on the last page. States can voluntarily report data on any diseases/conditions in this event code list to EPO through NETSS.

*Diseases in bold have been designated by CSTE as nationally notifiable and should be reported to CDC on a regular basis.

+Since CSTE position statements are not generally finalized until July of each year, the NNDSS data for the newly added conditions are not available from all reporting entities (States and Territories) which have designated it as notifiable (reportable) in their States, until January of the year following the approval of the CSTE position statement. As such, the “Notes” section includes the first full calendar year that a condition was added (or deleted) from the NNDL—the list of nationally notifiable infectious diseases.

Abbreviations and other notes:

CDC	Centers for Disease Control and Prevention
CSTE	Council of State and Territorial Epidemiologists
EPO	Epidemiology Program Office, Centers for Disease Control and Prevention
<i>MMWR</i>	<i>Morbidity and Mortality Weekly Report</i>
NCID	National Center for Infectious Diseases
NETSS	National Electronic Telecommunications System for Surveillance
NIP	National Immunization Program
NNDL	National Notifiable Disease List (infectious diseases reportable to CDC)
NNDSS	National Notifiable Diseases Surveillance System
SSB	Surveillance Systems Branch, EPO
STD*MIS	Sexually Transmitted Diseases Management Information System—software for STD surveillance and case management
TIMS	Tuberculosis Information Management System—software for TB surveillance and case management
VPD	Vaccine Preventable Diseases

For purposes of this document, “line_listed” data are meant to mean “case_specific” data.

NNDSS event code list October 31, 2002 final rev1.doc
Created using spreadsheet dated October 2002

Abbreviations are defined on the last page. States can voluntarily report data on any diseases/conditions in this event code list to EPO through NETSS.

***Diseases in bold have been designated by CSTE as nationally notifiable and should be reported to CDC on a regular basis.**
